1. Laptop A – Overview & Specifications

Laptop A is a mid-range productivity laptop designed for everyday computing, office work, and light multimedia use. It features a 14-inch Full HD display, an 8-core processor, 16GB of RAM, and a 512GB solid-state drive. The chassis is constructed from an aluminum-magnesium alloy for durability while keeping the weight under 1.4 kg.

Specification	Detail
Display	14-inch Full HD (1920x1080), IPS panel
Processor	8-core, up to 4.2 GHz
Memory	16GB LPDDR5
Storage	512GB NVMe SSD
Weight	1.35 kg
Ports	2x USB-C, 1x USB-A, HDMI, 3.5mm audio jack

2. Laptop A – Warranty Policy

Laptop A is covered by a standard 2-year limited manufacturer warranty from the original date of purchase. The warranty covers manufacturing defects in materials and workmanship, including faults in the motherboard, display panel, keyboard, and internal wiring.

The warranty does not cover accidental damage, liquid spills, unauthorized repairs, cosmetic wear, or damage resulting from use outside the recommended operating conditions (0 to 35 degrees Celsius). Customers may purchase an optional Extended Care Plan within 90 days of purchase to extend coverage to 3 years and add one instance of accidental damage protection.

To make a warranty claim, customers should contact TechNova Support with their proof of purchase and device serial number. Approved claims are resolved via repair, part replacement, or unit exchange at TechNova's discretion.

3. Laptop A – Battery & Maintenance

Laptop A ships with a 55Wh lithium-polymer battery rated for up to 8 hours of typical office use (web browsing, document editing, video playback at medium brightness). Battery life will vary based on screen brightness, background applications, and network activity.

To maximize battery lifespan, it is recommended to keep the battery charge between 20% and 80% for daily use, avoid exposing the device to temperatures above 35 degrees Celsius while charging, and perform a full charge-discharge cycle once every three months. The battery is rated for approximately 800 charge cycles before capacity drops below 80% of original design capacity.

Routine maintenance includes cleaning the ventilation ports every two to three months with compressed air, keeping the operating system and drivers up to date, and avoiding use on soft surfaces (such as beds or cushions) that can block airflow and cause overheating.

4. Laptop A – Troubleshooting

If Laptop A does not power on, hold the power button for 15 seconds to perform a hard reset, then attempt to power on again while connected to the charger. If the device overheats during normal use, ensure the ventilation ports are unobstructed and that background CPU-intensive applications are closed.

If the battery drains unusually fast, check for applications running in the background under the system's power usage settings. Persistent battery drain issues after a factory reset may indicate a hardware fault and should be reported through a warranty claim.

5. Laptop B – Overview & Specifications

Laptop B is TechNova's compact ultraportable model, targeted at students and frequent travelers. It features a 13-inch Full HD display, a fanless low-power processor, 8GB of RAM, and a 256GB solid-state drive, with a total weight of 1.05 kg.

Specification	Detail
Display	13-inch Full HD (1920x1080), IPS panel
Processor	Fanless low-power, up to 3.5 GHz
Memory	8GB LPDDR5
Storage	256GB NVMe SSD
Weight	1.05 kg
Ports	1x USB-C, 1x USB-A, 3.5mm audio jack

6. Laptop B – Warranty Policy

Laptop B carries a standard 1-year limited manufacturer warranty covering manufacturing defects. Because Laptop B is fanless, thermal-related claims are evaluated against TechNova's recommended usage guidelines before approval. An Extended Care Plan is available to extend coverage to 2 years.

7. Laptop B – Battery & Maintenance

Laptop B uses a 45Wh battery rated for up to 11 hours of typical use due to its lower-power processor. As with Laptop A, keeping charge between 20% and 80% for daily use will help preserve long-term battery health. Since the device has no fan, users should avoid blocking the rear vent strip during extended use.

8. Wireless Mouse M1 – Overview & Warranty

The Wireless Mouse M1 is a 2.4GHz wireless optical mouse with a rechargeable battery rated for up to 3 months of use per charge under typical conditions. It includes a USB-C charging cable and a nano USB receiver.

The M1 is covered by a 1-year limited warranty against manufacturing defects, including button failure, scroll wheel faults, and connectivity issues. Physical damage from drops or exposure to liquid is not covered.

9. Bluetooth Speaker S2 – Overview & Warranty

The Bluetooth Speaker S2 is a portable IPX5 water-resistant speaker with up to 12 hours of playback on a full charge and Bluetooth 5.2 connectivity. It supports pairing with two devices simultaneously.

The S2 is covered by a 1-year limited warranty. The IPX5 water-resistance rating covers splashes and light rain but does not cover submersion, and submersion damage voids the warranty.

10. General Return & Support Policy

All TechNova products may be returned within 14 days of delivery for a full refund, provided the item is unused and in its original packaging. Opened software licenses and consumable accessories are non-refundable.

Technical support is available through the TechNova Support portal, email, and phone. Customers should have their device serial number and proof of purchase ready when contacting support to expedite warranty and repair requests.

This document covers policy and product information only. For live pricing, current stock availability, and order status, refer to the product database rather than this manual, as that information changes frequently and is not maintained here.
